i use curl call ves

command:

```
curl http://127.0.0.1:8080/ -d '{"method": "order.put_limit",  
"params": [1,"DSHBCH",2,"100","1.5","0.0001","0.0001","", "id": 1]}
```

Response :

```
{  
  "error": {  
    "code": 10,  
    "message": "balance not enough"  
  },  
  "result": null,  
  "id": 1  
}
```

Contributor

user 1 has insufficient balance.  
run market.update(1, DSH, 2000)

3 participants

zsyh commented on Aug 27, 2019 • edited ▾

add some balance into user 1

```
{"method": "balance.update", "params": [1, "BCH", "test", 0, "150",  
{}, "id": 1]}
```

user\_id, currency, business, business\_id, change\_amount, detail

business\_id should increase during every request, else will return  
"repeat update"

more information see api doc
